PRICES in this catalogue cancel all previous lists and quotations and are subject to change without notice. **Prices include packing and F. O. B. our shipping point.**

TERMS cash with order.

SHIPPING COSTS: Add 10% to your order to cover postage or express and we will reimburse you by adding plants that will repay you. Plants will not be shipped C. O. D. unless 25% of the total value accompanies the order.

SHIPPING SEASON: All hardy water lilies and rock garden plants will be shipped as ordered. Tropical plants and Lotus, as soon as the weather permits planting.

WE ENDEAVOR to have all goods true to name, in full count, up to grade and in good condition when packed.

WE DO NOT ASSUME ANY RESPONSIBILITY for results after planting, owing to conditions over which we have no control, such as weather, care, etc.

ALL GOODS TRAVEL AT THE PURCHASER'S RISK AND EXPENSE.
ALL CLAIMS FOR DAMAGE IN TRANSIT MUST BE MADE AGAINST DELIVERING CARRIER.

Books

WATER GARDENS AND GOLDFISH. By R. V. Sawyer and E. H. Perkins. A valuable account of the care of water lilies and goldfish. Postpaid....\$1.65

ROCK GARDEN PRIMER. By Archie Thornton.

152 pages, 70 illustrations and four 4-color plates. An excellent volume, full of information and helpful hints covering the subject in a most interesting manner. Postpaid\$2.15

1001 GARDEN QUESTIONS ANSWERED.

A wealth of information of quick answers to definite questions. The book contains 320 pages and at times will be worth many times the price. Postpaid\$1.65

The Culture of Hardy Water Lilies

SELECT a sunny location.

ALLOW 12 inches of water over lilies and 12 inches of soil if possible.

PLANT in boxes, tubs or in soil that has been put in pool.

USE good garden soil, mix one-fifth well rotted cow manure or pulverized SHEEP MANURE and one quart of BONE MEAL to a bushel of soil.

DO NOT USE any quick acting chemical fertilizer.

CHANGE the soil completely every two years for best results.

PLANT hardy lily tubers with the growing end even with the surface of the soil, then put on an inch of sand.

WHEN RECEIVING plants do not allow them to become dry. Put in water until convenient to plant. If there are leaves on the plant cover with a wet sack.

OXYGENATING plants are planted either in pots or in the container with the water lily; they assist in keeping the pool clear and the fish in good health.

We are always glad to answer any questions pertaining to your water garden and care of gold fish, if you will just write us your troubles.

NOTE—

Fertilizer—Pulverized sheep manure, in handy packages, 5-lb. bags 30c; 10-lb. bags 50c; 25-lb. bags \$1.25.

Bone Meal—Put up in any quantities at 5c per lb.

RED VARIETIES

GLORIOSA. This lily is correctly named, being a gorgeous flower and truly a remarkable red, perfect in form and rather double. Its blossoms are often 6 to 7 inches across. No collection should be without this glorious and popular variety. It is always in bloom.....\$3.00

CONQUEROR. Often called the handsomest of the hardies. The flowers are carmine red, the petals flecked with white and lighter sepals. Often attains a size of 8 inches in diameter.....\$3.00

ESCARBOUCLE. The most brilliant flowered of all the red water lilies. Bright intense red, deepening to crimson with garnet stamens. The plant is a strong grower, producing its striking beautiful flowers in profusion. This is one of the outstanding hardy lilies.....\$3.50

ATTRACTION. A creation admired by all. The immense flowers are freely produced, opening a brilliant garnet red, the outer sepals almost white. As the flower ages the color deepens to rich crimson.....\$5.00

WILLIAM FALCONER. The flowers of this lovely lily are the deepest red of all, the garnet stamens producing almost a mahogany effect, making a pleasing combination. The leaves are beautifully mottled with brown. A vigorous grower and free bloomer.....\$5.00

ARETHUSA. Large deep rich crimson flowers with lighter sepals, producing a velvety sheen. One that you will enjoy.....\$5.00

MARLIAC RED. An old variety of the Marliac strain producing bright red flowers in abundance. A most dependable sort in every way.....\$3.00

SIRIUS. This magnificent plant is interesting. The large leaves; deep green spotted with purple brown on top, the underneath being a deep purplish red, and the flowers a dark velvety red with a heart of deep mahogany stamens. It has proven quite free in flower.....\$4.00

PINK VARIETIES

SOMPTUOSA. A recent introduction. This variety of French origin is exceedingly beautiful and attractive. The flowers are good size, very double and fragrant. The petals are rosy pink, deepening toward the center, and highly spotted with a deeper shade of color. The stamens are deep orange. A lovely combination.....	\$2.00
MRS. RICHMOND. A rare and handsome variety. The large floating cup-shaped flowers are fragrant, being a delicate violet rose; white sepals; yellow center. A creation of singular beauty. Strong vigorous grower and a free bloomer.....	\$4.00
FORMOSA. Immense tender lilac-like pink flowers with golden yellow stamens. The petals are wide and rounded at the tips, a pleasing fragrance and all in all it is one of the choicest pink lilies.....	\$3.00
MARLIAC ROSEA. Very large flowers of medium pink and deep rosy sepals. It has been popular for many years, and one of our good sellers.	\$1.50
GLOIRE de TEMPLE-SUR-LOT. Magnificent variety, quite different from the other nymphaeas. Flowers a tender pink color turning into pure white and is very large and fragrant. The petals, very numerous, long, narrow, pointed, wrinkled at the top and bending inside. Resembling in appearance the Cactus Dahlia. The stamens are bright yellow.....	\$3.00
SOUVENIR DE JULES JACQUIER. Large, double, globulous flowers, rose violet petals and mahogany stamens. The buds are very large and round. A very free bloomer. Flowers 8 inches in diameter.....	\$5.00
PINK OPAL. A beautiful flower of perfect shading and form. The blossoms are gracefully cup shaped. In color is a deep, rich pink and interesting form with comparatively short petals carried above the water. This flower has a substance which gives it distinct value for cutting. The blossoms stand up out of the water, making it a very showy plant.....	\$.75
ROSE AREY. The flowers of this exquisite variety has merit, being awarded a silver medal by the New York Horticulture Society. Rose Arey has a noticeable curl to its pointed petals of deep-cerise pink. The flowers sometimes reach 8 inches in diameter and is considered one of the best of this type	\$1.50
JAMES BRYDON. Another variety that when you see it you will want it in your collection. The flowers are decidedly globe shaped, very double and crimson red. The texture of the petals resembles crepe paper, and the flowers are quite massive in appearance. One of our choicest lilies.....	\$2.50
NEPTUNE. The attractive flowers are beautiful, pink petals flushed with red at the base. One cannot help but enjoy this plant for it is always full of bloom	\$2.50
TUBEROSA ROSEA. Large blossoms that are rosy pink. Its pleasing fragrance seems to go with just such a color. Worthy of your selection.	\$1.25
MADAME JULIEN CHIFFLOT. A choice plant producing enormous flowers and numerous spreading leaves. The petals are finely veined and dotted with carmine red, producing a rosy carmine color. Numerous stamens, curved at the opening of the flower, forming a fine golden crown above the stigmatic section of a bright yellow color. The whole of the flower produces a very fine effect against the green leaves.....	\$5.00
CHARLES DE MEURVILLE. A new variety recently imported from France. The blossoms are quite large and of the same type as Conqueror. In the spring they are pink, becoming suffused with red during the summer. These flowers nestled among the large green leaves are always appreciated	\$5.00

ODORATA RUBRA. This beautiful flower of bright rose petals and rich yellow stamens has been greatly appreciated and is well worth having in your collection	\$1.25
RENE GERARD. A recent introduction from France. The flowers, a charming blend of deep old rose, with numerous petals curling at the edges and tapering to waxy points. A choice variety.....	\$3.50
CARNEA. The flesh pink flowers open quite early in the morning with a very dainty perfume. A vigorous free blooming variety of the best type. One of the popular kinds.....	\$.75
W. B. SHAW. Remarkable for large rosy pink flowers which stand well above the water. It is quite fragrant and produces abundance of bloom through out the season.....	\$1.25
JAMES HUDSON. Another one of our recent introductions from France. Very large magnificent, tulip-shaped flowers with sharp petals. The flowers are rich rose crimson, outer petals white stained rose. Round leaves just a little indented.....	\$5.00

WHITE VARIETIES

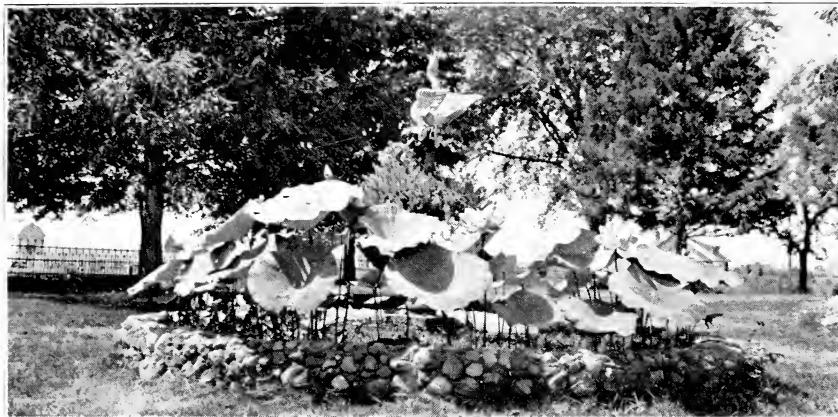

GONNERE. Of all our introductions of hardy water lilies from France, Gonnere is without a doubt the most spectacular and appreciated lily we have. Any description hardly does it justice. Flowers an enormous globe of dazzling white, very double with stamens of canary yellow.....	\$4.00
GLADSTONE. An old variety, one that has become more popular year after year. Pure snow white flowers that open early in the morning as well as early in the season. Vigorous grower and should have plenty of room	\$1.50
ALBIDA. Another large dazzling white flower with yellow stamens, making a wonderful contrast in your collection. The blossoms are 5 to 6 inches in diameter and freely produced. One of our best sellers of this type....	\$1.00

SUNSET COLORS

COMANCHE. Considered the best of all the sunset colors. The large flowers are copper yellow ochre, net-like and streaked with deep red; orange stamens. With age the flowers deepen to a warm orange red. The leaves olive green flecked with brown. It blooms more persistently than some of the other varieties.....	\$2.50
PAUL HARIOT. Producing flowers of good size. Upon opening the first day the flowers are a clear copper pink and each succeeding day they deepen in color. Thus it presents the appearance of different flowers at one time. An exceptionally good sort with a long blooming season.....	\$.75
ROBINSONI. This lily has always been a favorite with water gardeners because of its unusual bright warm tone of red copper with orange red stamens. You can always expect Robinsoni to be the last to close up for the day	\$3.00

YELLOW VARIETIES

SUNRISE. There can be no better yellow water lily grown. The flowers are immense, averaging over 10 inches in diameter on well developed plants. Even as young plants it surpasses all others in size. Beautiful sulphur yellow crepe-like blossoms with an indescribable natural grace, resembling the tropical night bloomers. One of the most admired lilies in our pools.....	\$3.50
CHROMATELLA. There are probably more hardy water lilies sold of this variety than any other. It is a free bloomer and vigorous grower, flowers are bright canary yellow with broad curving petals. The deep green leaves are beautifully blotched with brown. It blossoms over the entire spring and summer, producing an endless succession of its large blooms.	\$1.50

The Sacred Lotus *Nelumbiums*

THE *Nelumbium* is a native of India, and was held sacred by the Hindus. It was early introduced into Egypt and the Egyptians made use of the seeds for food. One of the species was introduced into America about 1876 and from that time on the *Nelumbium* has grown in popular favor. It is perhaps one of the most interesting plants in the water garden.

The roots look like bananas and in planting, care should be taken not to break the growing point, which would render the tuber useless. Plant the roots in the soil in a horizontal position and cover to a depth of six inches, with a coating of one inch of gravel, or coarse sand over the soil. They require the same general care as hardy water lilies, but should be confined within containers, or if the dirt is in the bottom of the pool, a partition should be built so as to keep the Lotus separated from the rest of the aquatics.

EGYPTIAN LOTUS (*Nelumbium Speciosum*). Its beautiful flowers are often 12 inches across, of a deep rose color on opening the first day, becoming paler as the flower gets older, until the third day when the color is creamy white at the base and center of the petals, the edge tinted light rose pink. The deep green leaves are quite large, being a light silvery green on the reverse. A free bloomer.....\$2.00

CHINESE RED LOTUS (*Nelumbium Pekinensis Rubrum Flore Pleno*). The best of the deep colored varieties. The flowers are very large and double of a bright rose carmine color. The growth of plant and leaves is magnificent. Its flowers are borne on strong stems well above the foliage\$4.50

ALBUM STRIATUM. An attractive color combination, the large fragrant white flowers are faintly striped and tipped with rosy carmine. The plant is a vigorous grower and free in flower.....\$3.50

SHIROMAN. A magnificent variety, producing large double flowers; on first opening they are cream colored with a few of the petals tinted a bright green; as the flower gets older the color fades to pure white. The blossoms last well as cut flowers.....\$2.50

LUTEUM. A beautiful yellow flowered species, found growing wild in parts of America. It is perfectly hardy, of easy culture and is especially good for planting in large ponds or pools.....\$2.00

Tropical Water Lilies

OF the tender or tropical water lilies there are two distinct classes—one flowering during the day, the other during the night, opening early in the evening and closing late in the morning.

The Tropical water lilies have come into favor the last few years, their magnificent large sweet scented flowers are always admired. It is surprising what quick growth they make, and come into flower when the temperature is suited to their liking. It is best to start them in containers in shallow water, lowering them as the growth develops, for the young plants require all the heat available.

DAY BLOOMING VARIETIES

PANAMA-PACIFIC is a very fine flowering variety of the viviparous group.

The buds are bronzy-green, spotted with reddish-brown. On first opening the flowers are a rich-rosy red; when fully open the color is a distinct reddish-purple with yellow stamens. This variety is highly recommended. **\$2.50**

AUGUST KOCH. The flowers are quite large, sepals are purplish lilac, the petals pale wisteria violet. It also belongs to the viviparous class (by this is meant the peculiar characteristic of producing young plants upon the surface of the leaf). The leaves are peltate averaging fourteen inches across, green on the upper surface. This is an excellent variety. Very free in bloom **\$2.50**

NIGHT BLOOMING VARIETIES

OMARANA bears flowers from 8 to 12 inches across, of a beautiful rosy red shade with a faint tinge of white down the center of the petals. The stamens are deep orange red; the leaves deep bronze green above with dentate margin; the reverse brownish green. A very fine and free flowering sort **\$1.50**

FRANK TRELEASE is the deepest colored of its class, the flowers being a brilliant glowing dark crimson, measuring from 8 to 10 inches across. The stamens are deep reddish brown. Leaves are extra large, of a beautiful dark bronze color; the underside is greenish brown. A very attractive variety **\$1.50**

Star Lilies

The Hardy Tropical Lily

IT is hard to believe that one plant could send forth so many brilliant starry blossoms in one season as the star lilies will do. It being no unusual thing to count more than 100 blossoms from a single plant, produced in profusion the entire summer.

At the Rock Garden in Miller Park, Bloomington, Ill., visitors would often say, "As many times that I have visited these pools I have never seen the Star lily without at least two to four blooms at one time."

Star lilies are called the hardy tropicals. The winter care is quite simple for you may at the approach of frost remove them to the basement allowing the tubers to go through a curing of hardening process by leaving them a couple of weeks to partly dry. Remove the tubers and wash, storing them in moist sand. Plant out in May, treating the same as for the Tropical Lilies.

ROSE STAR. A delightfully fragrant starry blossom of rose pink, the fragrance of the "Lily of the Valley." A surprise awaits you when the large flowers begin to burst forth in endless succession, sometimes 3 or 4 will be open at once. An excellent cut flower, lasting several days **\$2.00**

BLUE STAR. The same general appearance as the Rose Star, only in color, a true blue and when planted with Rose Star you have a combination of colors that are beautiful. All Star lilies stand out of the water on stiff stems 8 to 10 inches high **\$2.00**

The Natural Effect for Your Pool

IN creating a picture in your garden, there is no other spot that requires natural effect more than the naturalistic pool with its curves of rocks and arrangement of shallow and deep waters. Give it an effect such as nature intended. Such a picture is easily established in your own garden by the arrangement of suitable plant material such as you will find listed in the following pages, material that can be beautifully arranged. Many of the shallow water plants may be potted and raised to within 2 to 6 inches of the surface or they may be planted on a ledge if the water in your pool is too deep.

The oxygenating plants are not only decorative in your pool but very necessary in assisting to keep the water clear and pure. The growing plants under the water either absorb the impurities or release oxygen, which is very beneficial to the fish. They also provide green food and also a good material for their spawning beds. It is very beneficial to plant quantities of moss. Many make the mistake by not planting enough in their pool.

Shallow Water Plants

PICKERAL PLANT. An attractive plant, growing at least two feet tall, each heart-shaped leaf ending in a spike of purple flowers. Grows in graceful clumps. A plant you will enjoy. Each.....	\$.25
FLOWERING BULRUSH (<i>Butomus Umbellatus</i>). A very pretty aquatic with narrow three cornered leaves from two to three feet in length. The flowers, which are purplish pink, are borne in umbels at the end of a long round stem, very attractive and unusual. Each.....	.25
WATER IRIS (<i>Pseudacorus</i>). Sometimes called yellow flag. Grows 18 inches tall, sword-like leaf. Yellow flowers. Very attractive, a good shallow water plant and for pool margins. Each.....	.25
WATER IRIS (<i>Versicolor</i>). Similar to the <i>Pseudacorus</i> only bears blue flowers. Each25
WATER IRIS (Dorothy K. Williamson). An American hybrid. Royal purple flowers, entirely different and quite large. A beautiful pool plant. Also fine for table bouquets. Should be in every collection. Each.....	.50
WATER POPPY (<i>Limnocharis Humboldt</i>). Beautiful little yellow poppy-like flowers, borne on stems that rise above the water and blooms profusely through the season. The thick leaves are broad oval shaped of a dark green color. Can be planted with the water lily, as it has trailing habits that make it desirable. Each.....	.15
WATER HYACINTH (<i>Erchonia Crassipes</i>). A showy, interesting, floating plant. Much used in ponds and pools. The petioles are inflated, forming a sort of bladder arrangement that keep the plant afloat. If the water is shallow the plants will take root in the soil, and grow and flower more freely than if floating around in the water. The flowers are borne on a stem about one foot in height, six to eight flowers in a loose spike; pale blue with a large blotch of deep blue and a yellow spot on the upper lobe. Each10
SWEET FLAG (<i>Acorus Calamus</i>). Grows to a height of 2 to 3 feet, and has lance-shaped leaves. All parts of the plant have a strong, aromatic taste and the rhizomes much used by perfumers. Each.....	.25
GIANT ARROWHEAD (<i>Sagittaria Sagittifolia</i>). Plant has large, arrow-head leaves and bears a spike of white bloom. Grows to height of 2 to 3 feet. Flowers freely and is quite hardy. Each.....	.10
WILD RICE (<i>Zizania Aquatica</i>). A fine plant for the pond, where it should be planted near the edge or center, in shallow water. The large, loose flower panicle is produced on stems of from 8 to 10 feet in length. The plant forms a fine grasslike clump, and is quite attractive. This is an an-	

nual; however, it will self-sow and come up annually. Each.....	.10
PARROT FEATHER (<i>Myriophyllum Proserpinacoides</i>). May be planted in a water tight hanging basket or near the edge of the pond where it will trail over the water. The bright green whorls of feathery leaves make it a very attractive plant. A bunch.....	.25
SPEAR HEAD (<i>Sagittaria Natans</i>). Lanceolate leaves and spikes of white blossoms with yellow eye. Blooms the entire season. Each.....	.25
UMBRELLA PALM (<i>Cyperus Alternifolius</i>). One of the finest plants for growing at the edge of the pool in shallow water or in the aquarium, also as a house plant. It grows from $1\frac{1}{2}$ to $3\frac{1}{2}$ feet in height, having a tufted head of leaves, giving the pool a setting of tropical appearance. Each...	.25
EGYPTIAN PAPER PLANT (<i>Cyperus papyrus</i>). Also a very interesting plant and one that should be in every water garden. It attains a height of 3 to 5 feet; on the end of the stalks is a tuft of long, threadlike leaves, which gives the plant a very graceful and striking appearance. It thrives well in shallow water. Each.....	.35
FLOATING HEART . This plant has leaves like a miniature water lily. Bears bright yellow flowers very profusely. Hardy. Each.....	.15
DUCK WEED . The smallest floating water plant. Small frond-like plants giving the effect of green carpet on the water. Fish are very fond of this plant, and gives them green food. A portion.....	.10

Marginal and Bog Plants

CARDINAL FLOWER (<i>Lobelia Cardinalis</i>). Grows from 2 to 4 feet high. The flowers are bright intense cardinal red, borne on a long spike. It delights in wet soil, flowering from July to September. A bouquet of cardinal flowers and summer Lilac or Buddlia makes a handsome table decoration. Each25
PINK TURTLE HEAD (<i>Chelone Lyoni</i>). The flowers which are borne on 2 to 3 foot stems, resemble a turtle head. They succeed well in moist rich soil in a sunny location. The flowers are useful for cutting. Each25
FORGET-ME-NOT (<i>Myosotis Palustris Semperflorens</i>). Large, rich blue flowers with yellow eye; a charming plant for damp places and a profuse bloomer. Each10
PITCHER PLANT (<i>Sarracenia Flava</i>). Has narrow pitchers, $2\frac{1}{2}$ feet long, yellowish green. The most graceful of all the pitcher plants. Each35
PITCHER PLANT (<i>Sarracenia Purpurea</i>). Produces pitchers which attain a length of from 8 to 12 inches, green colored, with purple veins. The flowers are borne on stems from one to two feet high, and are two inches across. The petals are dull purple. The hardiest of the pitcher plants. Each25
JAPANESE IRIS (Mixed Colors). Delights in rich wet soil, where the plants will grow to a height of $4\frac{1}{2}$ feet. When they flower, in June and July there is nothing in hardy plants that can rival them in the gorgeous colors of the blossoms, which frequently measure 12 inches across. They have both double and single flowers, the colors of which range from white, lilac and crimson purple, to the deepest purple imaginable. Some have variegated or spotted flowers. All of the blossoms have pure yellow centers. The plant thrives equally well when planted in shallow water. Each25
RIBBON GRASS (<i>Phalaris Arundinacea variegated</i>). Sometimes called Reed Canary Grass. A fine low growing, variegated, hardy perennial grass, from one to two feet in height. The green blades are striped white. Each10
PAMPAS GRASS (<i>Gynerium Argenteum</i>). A beautiful subject. Growing 8 to 10 feet, and bears long fluffy white plumes. It should be protected by covering in the winter. Each.....	.25
LEMON LILY (<i>Hemerocallis Flava</i>). Gives beautiful, single, lemon yellow	

flowers, which grow on stems from 2 to 3 feet high. The leaves are narrow, 2 feet in length. Flowers in June. Each.....	.25
HEMEROCALLIS THUNBERGII. Much like Flava, but flowers in July, a month later. Spikes 2 to 3 feet tall and a pale yellow blossom. Each...	.25
CALLA LILY (Yellow). Large trumpet shaped yellow flowers. The foliage gives a most luxuriant tropical effect throughout the summer. The bulbs may be stored during the winter. Does well in shallow water or moist ground around the pool. Potted.....	1.00
FUNKI-VARIEGATA (Plantain Lily). Excellent for growing in partially shady borders or on the margins of the water. Handsome variegated foliage and lily-like blue flowers, borne on graceful spikes. Each.....	.25
FUNKI-SUBCORDATA GRANDIFLORA. For the same purpose as "Variegata." Pure white flowers from 4 to 6 inches in length and from 3 to 5 inches broad, bell-shaped; borne on spikes carrying from 9 to 15 flowers, the spikes 1½ to 2 feet high. They bloom in July and August. Each25

Oxygenating Plants

COMBOMBA (Fanwort). A useful moss plant growing entirely submerged; it emits roots readily. The leaves are glossy green and fan-like. A well known and much used variety. Per bunch.....	.10
MYRIOPHYLLUM. Submerged leaves in whorls, giving the appearance of plumes growing in a bushy formation. An excellent plant for spawning purposes. Per bunch10
COON TAIL (<i>Ceratophyllum Demersum</i>). Narrow, bristle like leaves, are divided three or four times into forks, making a very dense plant. It grows entirely submerged and should be planted on the bottom of the pool. A beautiful and useful moss. Per bunch.....	.10
ANACHARIS. A rapid growing plant, with dark green leaves formed around the stem. Usually termed as fish moss, growing submerged. Per bunch10
LUDWIGIA. Grows submerged or will extend above the water and float when planted in shallow water. The foliage is quite attractive, the green leaves are long oblong; the flowers are small and reddish colored. It is also quite decorative in the aquarium. Per bunch.....	.10

Snails (Scavengers)

JAPANESE. Large trap door live bearing snails that are most interesting and beneficial, owing to their size. Per pair.....	.25
AFRICAN. Sometimes known as the "Paper Shell." Medium sized. The shells are yellowish brown, with dark spots or mottled. Very prolific. Each, 5c; dozen50
BLACK RAMSHORN. Medium sized snails with shell characteristic of the name. Very prolific egg layers and particularly useful. Each, 5c; doz...	.50
POND SNAILS. A small species, but multiply rapidly and very useful in removing the algae and green scum that forms in the sunlight. Each, 5c; dozen50

FISH FOOD

Especially prepared food, a balanced ration. Per can.....	.10
FISH	

Extra large, fancy gold fish may be obtained, as well as the more common varieties, in all sizes and prices at our gardens. However, we do not often ship fish.

General List of Rock Garden and Herbaceous Plants

*Plants preceded by a star are rock garden plants. Many of them grow large enough to be grown on the margin of the border, as well as in the rockery.

*AUBRETIA

—**Crimson King.** A dainty creeping plant used for carpeting, being very desirable for rockeries. Masses of rich crimson flowers. Grows 6 to 8 inches high. Each, 25c; 3 for..... .65

*AJUGA

—**Reptans Rubra.** A rockery or ground cover plant with dense foliage. Grows 3 to 4 inches high. Deep purplish blue flowers. Suitable for shade and part sunny locations. Each, 25c; 3 for..... .65

*ACHILLEA

—**Milfoil or Yarrow.** Finely cut deep green foliage, pink flowers in dense heads. Suitable for rockeries or general use, 12 inches high and flowers all summer. Each, 25c; 3 for..... .65

*ALYSSUM

—**Saxatile Compactum.** "Basket of Gold." Broad masses of bright yellow flowers in early spring. Useful in border as well as rock garden. Prefers sunny location. One foot high. Each..... .15

*ARMERIA

—**Bee's Ruby.** Used extensively in rock garden planting in sunny location. Flowers brilliant red. June to August, 2 feet high. Each..... .35

*AQUILEGIA

—**Columbines.** Mrs. Scott Elliot Long-Spur. The Columbine is one of the most beautiful of all hardy plants. Their period of flowering covers the late spring and early summer months. They are ideal plants for perennial borders and rock gardens. Assorted colors. Each, 20c; 3 for..... .50

*CALLUNA

—**Nana.** An attractive plant in the rock garden, evergreen foliage. Grows 6 inches high. Each..... .35

*CALAMINTHA

—**Alpina.** A good rock garden plant or for the edge of the border. Succeeding well in dry ground in a sunny position. Small blue flowers in June. Six inches. Each

.25

*CRUCIANELLA

—**Staylosa.** A delicate plant of creeping habit, for the rockery or front of borders. Early flowering and hardy: Bright purple, ball shaped flowers. Height, 6 inches. Each, 20c; 3 for..... .50

*CERASTIUM

—**Tomentosum.** "Snow in Summer." A low growing plant having silvery white foliage and producing an abundance of snow white flowers in May. Especially suitable for rockery or border purposes. Each..... .15

*CHEIRANTHUS

—**Allioni.** "Siberian Wall Flower." A beautiful rock garden plant. Dazzling fiery orange flowers, on stems about a foot high. Best used as a biennial as it frequently blossoms itself to death. Each, 15c; 3 for..... .35

***CACTI**

—**Grey Beauty.** An outstanding hardy dwarf variety, intensely red flowers.
Each25

***CACTI**

—**Prickley Pear.** Large flat spiny pads forming interesting clumps. Flowers waxey yellow, followed by red pods of fruit in fall. Edible. Perfectly hardy. Large clump, each20

CAMPANULA

—**Medium.** "Single Canterbury Bells." Tall, erect growing plants completely covered with large bell-shaped flowers during late May and June. One of the loveliest of biennials and a perfect plant for the old fashioned hardy garden. Each20

CHRYSANTHEMUM

—**Alaska.** "Shasta Daisy." Useful plant in the hardy border. Deep green leaves. Flowers profusely during early summer, of the purest glistening white, with broad overlapping petals and borne on long stems. A beautiful cut flower. Grows 3 feet tall. Each, 15c; 3 for35

***DICENTRA**

—**Eximia.** "Plumy Bleeding Heart." A dwarf growing sort, with beautiful finely cut foliage and showy racemes of pretty pink flowers throughout the season. Extra nice plant and most satisfactory. Each25

***DICTAMNUS**

—**Gas Plant.** One of the most satisfactory hardy plants in cultivation, both on account of its splendid flowers and rich durable foliage. Each50

DIGITALIS

—**Gloxiniaeiflora Purpurea.** "Foxglove." Tall, stately spikes of tubular or bell-shaped flowers in June and July. Clumps of large dark, dull green leaves. Purple spotted flowers. A very showy plant. Height, four feet. Each, 15c; 3 for35

—**Grandiflora.** 2 to 3 foot spikes in June and July. Yellowish flowers, marked with brown. Very effective in groups and is becoming more popular in the perennial border. Each, 15c; 3 for35

FUNKIA

—**Subcordata Grandiflora.** Hardy, herbaceous perennial with handsome green foliage and lily-like flowers borne on graceful spikes. Very large pure white flowers in August and September. Each25

FUNKIA

—**Variegata.** Variegated foliage, blue flowers. Beautiful edging plant. Each25

***HEUCHERIA**

—**Sanguinea.** "Coralbells." A graceful flowering perennial. Effective subject for rockery, margins of borders, as edgings to walks and flower beds. Flowers bright crimson on 12 to 18 inch stems. June to September. Nice for cutting. Each, 25c; 3 for65

HEMEROCALLIS

—**Dumortieri.** Height 1½ to 2 feet. Orange flowers; tube very short, being 2-2½ inches long, while in other varieties they are 3 to 4 inches long. Leaves 12 to 15 inches in length. Flowers in June. Each25

—**Flava.** "Lemon Lily." Sweet scented, clear full yellow. Height, 2½ feet. Flowers in June. Very useful in the Iris garden and pool margins. Each25

—**Thunbergi.** Much like Flava, but flowers in July, a month later. Spikes 2 to 3 feet tall and pale yellow blossoms. Should be in every garden to continue the season of the Hemerocallis. Each25

HESPERIS

—**"Sweet Rocket."** Mixed colors. An old and popular garden flower. Very

fragrant, will grow anywhere in full sun or light shade. Desirable for wild gardens, shrubbery or mixed border. 2 to 3 feet. Colors, purple and white. Each, 10c; 3 for.....	.25
*IBERIS	
— <i>Sempervirens</i> . "Candytuft." Excellent for rock garden. A mass of white flowers in spring, completely covering its rich dark green foliage. Very attractive. Height, 6 to 8 inches. Each.....	.15
*IRIS CRISTATA	
—A species for rockeries and underplanting in semi-shady places. Grows from 4 to 6 inches high and has richly marked pale lilac blossoms in late May. Good for ground cover and among tulips. Each, 20c; 3 for.....	.50
*LEONTOPODIUM	
— <i>Alpinum</i> . "Edelweiss." A well known Alpine with pretty white leaves and small yellow flowers, which are surrounded by star-like heads of leaves, clothed with a dense white wooly substance. A splendid plant for the rock garden. Height, 4 to 5 inches. Each, 25c; 3 for.....	.65
*LINUM	
— <i>Perenne</i> . "Blue Flax." Excellent rock garden and sunny border perennial. Very attractive, both in feathery foliage and bloom. Flowers pale blue on slender, graceful stems. Each.....	.15
— <i>Narbonnense</i> . "Flax." A rock garden variety forming a spreading clump of attractive foliages, with a profusion of azure blue flowers with white eye. Very handsome. Each.....	.25
*LINARIA	
— <i>Macedonia Speciosa</i> . "Toad Flax." A hardy perennial that can be used where medium height is needed in rock garden work. The flowers resemble large golden yellow snapdragons, borne on stems averaging 3 feet. The foliage is rather attractive and has a silvery medium-sized leaf which extends up the stems at the joint where the flowers advance. A plant that should be better known. Each, 25c; 3 for.....	.65
LUPINUS	
— <i>Lupine</i> . Mixed colors. Stately and beautiful perennial. 3 to 4 foot spikes of blue, white or pink pea-shaped flowers, blooming in May and June. Very popular for cut flower. Each.....	.25
LIATRIS	
— <i>Pycnostachya</i> . "Blazing Star or Gay Feather." An attractive and odd plant. It blooms in July and August. The long narrow spikes of rich purple flowers four feet high and last a long time. Does well in poor or rich, dry or moist soil. Effective if planted in clumps. Each, 25c; 3 for.....	.65

- *Divergens.** Is a Western native and very desirable. Bead like leaves; makes neat mats. The green and red foliage is evergreen. Only grows an inch or so high and rarely blooms. The flowers are yellow stars. Each, 25c; 3 for..... .65
- *Reflexum Crestatum.** "Cockscomb." Vivid evergreen foliage around wide fleshy flat stems, producing the appearance of the well known cockscomb. A most attractive variety. Each..... .25
- *Daisyphyllum Corsicum.** Bluish-gray beads set tightly on frail stems, covered in summer with small flushing stars. One of the smallest of the Sedums. Creeper. Each, 25c; 3 for..... .65
- *Glaucum Hispanicum.** A sweetly pretty little species, tiny growth, pink flowers. Each, 25c; 3 for..... .65
- *Altissimum.** Pale yellow flowers. A good showy Sedum. 10 inches high. Each, 25c; 3 for..... .65
- *Spurium Coccineum.** A beautiful rosy crimson-flowered form; July and

August. 6 inches high. A very fast spreading variety. Foliage turns to an autumn color after frost. Each.....	.10
—* Spurium-Stoloniferum. Pink or white flowers $\frac{3}{4}$ inches across; anthers reddish, has trailing habits. The stems ascending 6 inches high. Each..	.15
—* Sarmentosum. Excellent dwarf variety, the best for filling seams between rocks; rapid grower. Bright yellow flowers. Makes an attractive soft carpet. Each, 25c; 3 for.....	.65
—* Album. Dwarf and spreading; thick waxy round evergreen foliage, white flowers. Each15
—* Acre. A pretty species, and most always seen in every collection. Foliage green; flowers bright yellow; prostrate and spreading. Each.....	.10
—* Sieboldii. A charming alpine, growing in miniature tufts. Glaucous grey blue foliage, each leaf being rimmed with a circle of crimson. Very attractive. Flowers pinkish. Each.....	.25
—* Stotonifer Rosea. One of the most desirable, evergreen leaves; flowers purplish pink; July and August. Height, 6 inches. Each, 25c; 3 for.....	.65
—* Brownii. Succulent leaves; grows like a tiny spruce evergreen. A pleasing effect. Each, 25c; 3 for.....	.65
—* Kamtschaticum. Greenish pink stems or branches from 6 to 10 inches long. Coarsely toothed deep green leaves. Flowers yellow. Each, 25c; 3 for65
—* Anglicum. Dense masses of trailing and erect shoots. 3 inches high. Flowers white or rosy tinted. Each.....	.25

Sempervivum

(Houseleek)

***SEMPERVIVUM** prefer mostly sunny locations and together with the Sedums are our finest Rock Plants. The interesting types, with fleshy leaves forming rosettes of varying color are most interesting and are offered in this list. These plants are frequently referred to as "Hen and Chickens."

—* Tectorium. Broad rosettes, the leaves having reddish brown tips; flowers pale red. A large variety. Large, each 25c; small, each.....	.15
—* Braunii. A very attractive rosette-like plant. The color of the leaves are bronze, almost a dull red at tips, at the base a dull green. Each.....	.25
—* Funckii. Green tipped brownish rosettes, produced rapidly in great numbers. The succulent leaves are narrow and finely pointed, hair-like surface. A very fine sort. Each.....	.25
—* Globeferium. Flattened rosettes 2 to 5 inches in diameter of grey-green leaves, lightly tipped brown. Pale yellow flowers three-fourths to one inch in diameter, in densely hairy panicles. Each.....	.20
—* Doellianum. Small hairy rosettes of light green leaves. Flowers red. Tips of the inner leaves connected with a few arachnoid threads. One to one and one-half inches across. Each.....	.25
—* Blandum. Rosettes $1\frac{1}{2}$ to 2 inches in diameter greenish color. Flowers pale rose. Each.....	.25
—* Riebricundium. "Hybrid." Bright red rosettes and purple rose flowers. Turns deep red after frost. Each.....	.25
—* Arachnoideum. Cobweb rosettes $\frac{1}{2}$ to $\frac{3}{4}$ inches in diameter, consisting of about 50 leaves connected with long soft white hairs, giving the appearance of a spiderweb. Bright red flowers about one inch across. Each....	.25

NOTE—Our gardens are always open to the public. We have many other varieties of perennials. Also the German, Siberian, and Japanese Irises, which are not listed in this catalogue but may be seen and obtained at the gardens.

***SCABIOSA**

—*Japonica*. Lavender-blue flowers from July to September. Sometimes called the hardy pin cushion. This is a biennial variety, but very valuable for its great quantity of blue flowers produced throughout the summer. Each, 20c; 3 for..... .50

STALICE

—*Latifolia*. Grows 15 to 18 inches high with tufts or clumps of thick, leathery foliage and immense panicles of delicate lavender flowers. The individual flowers are very minute, similar in form to the Forget-Me-Not, but made into heads 18 inches or more across. Each..... .25

***TUNICA**

—*Saxifraga*. Slender, graceful, with almost hairlike stems covered all summer with small Baby's Breath-like flowers. Excellent for rock garden, rock walls or in front in sunny borders. Each..... .10

***THYMUS (Wooley Thyme)**

—*Lanuginosus*. A species with small roundish wooley leaves. It is a desirable plant for rock-work or edgings. Each..... .25

***THYMUS**

—*Citriodorus*. Foliage has strong lemon fragrance. Excellent for rock work. Height 4 inches. All the Thymes are dwarf-growing, almost prostrate and creeping habits. Each..... .20

***THYMUS**

—*Coccineus*. Dark green foliage and bright red flowers. A most effective variety. Each

.20

***THYMUS**

—*Nitidus*. This plant is a native of Mt. Etna, growing 4 inches high and bears rose colored flowers. Each..... .25

.25

***VERONICA**

—*Saxatilis*. Pretty for rockery, small rose pink flowers; spreading habit. Each

.25

—*Rupestris*. Fine Carpet plant. A dwarf, thickly-foliaged form with masses of bright blue flowers. Grows 4 inches high and flowers in June. Excellent for rockery. Each..... .20

.20

—*Rupestris Nana*. Prostrate and creeping, forming a dark green carpet of shiny foliage, which is covered with deep Gentian blue flowers in late April and early May. Good rockery plant. Each..... .25

.25

—*Incana*. A strong, upright and ascending white-woolly plant, 12 to 18 inches high. Racemes of blue flowers from July until September. A useful rockery or border plant with good foliage. Each..... .25

.25

VERONICA

—*Longifolia Subsessilis*. A vigorous growing plant with branching stems, 2 to 5 feet high. Terming cylindrical spikes of rich blue flowers. July to September. An attractive foliage of roughened bronze green. Each.. .25

.25

***VERBENA**

—*Benosa*. This variety is hardy and becoming very popular. It is a strong thrifty grower, about one foot high and covered from early summer until late fall with its large bright heliotrope flowers. Each..... .15

.15

***VIOLA**

—*Mixed Color*. Popular garden flowers. They differ from the ordinary pansy by being more compact in habit and more continuous and free in flowering. If the spent flowers are regularly removed they may be had in bloom from May to October. A plant that is always admired and has exceptionally attractive flowers. Excellent for foreground in Rockery, also attractive as Tulip bed ground covering. Yellow Violas with Hemerocallis Flava make a lovely yellow garden. Each..... .10

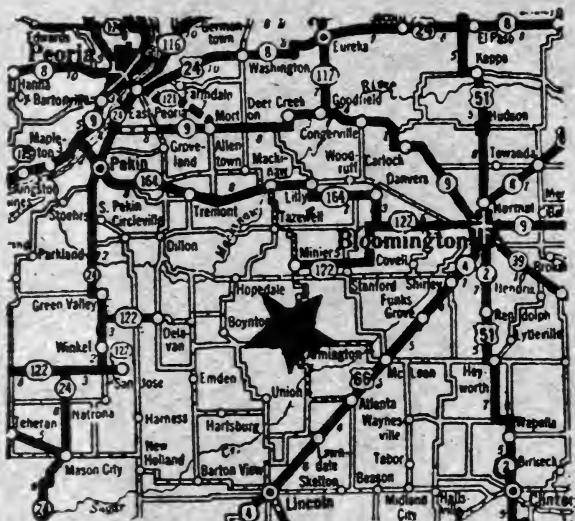

.10

***VINCA "Perry Winkle or Myrtle"**

—*Minor*. A trailing evergreen plant. Used extensively for carpeting the ground. Suitable to grow as edgings and in rockeries. Each..... .10
